

CarInsurance.com Names the Most and Least Expensive ZIP Codes for Car Insurance

March 10, 2020

Foster City, CA – March 10, 2020 – Where people live and what ZIP code they claim surprisingly plays an outsized role in how insurance companies determine insurance rates. To shed light on this practice and help consumers save money, <u>CarInsurance.com</u>, a one-stop destination for unbiased, expert advice on car insurance, released today new data showing which ZIP codes are most and least expensive for car insurance.

Based on the number and severity of car insurance claims within an area, insurers assign ZIP codes different risk levels. Insurers look at factors such as frequency of thefts, collisions and vandalism to gauge the likelihood of such incidents happening to drivers within a given ZIP code. This is generally used as the base rate from which insurers calculate premiums. Other pricing factors, such as your driving record, type of car you drive and your age are then added into this calculation.

State	ZIP Code	City/Borough	Average rate for that ZIP code	State average	% higher than state average

New York	11212	Brooklyn	\$5,703	\$2,062	177%
